Reeetesh Mukul

Sep 2016–Apr 2021

Senior Computer Scientist

Adobe | India

Led applied ML and performance research for creative applications, including visual similarity, panoptic segmentation, and interactive systems. Developed reinforcement-learning and multi-armed-bandit methods for adaptive scheduling, resource management, and job-executor control; co-invented techniques for responsive input, UI scheduling, teeth-region detection, and application-performance management.

2015–2016

Senior Software Developer / ML Engineer

Flipkart | India

Developed ad click-prediction models for CTR, CVR, ranking, and sampling, and contributed to the Android native-ad SDK.

2008–2015

Software Developer to Senior Software Developer

Qualcomm | India

Built OCR for Indic Devanagari characters, scene-detection capabilities for camera workflows, voice state-machine components, and embedded drivers.

2006–2008

Software Developer

Texas Instruments | India

Developed software for GPS components in embedded environments.
